

Application Number: 09/767,161  
Applicant: Harold Keith  
Examiner: Minh Dieu Nguyen

In response to the Office Letter mailed 10/5/05 please review remarks to Application Number 09/767,161.

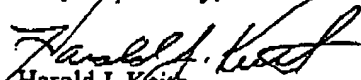

#### REMARKS

1. The specification has been amended to make some editorial corrections therein.
2. The claims have been amended to define the invention more particularly and distinctly as a result of a review thereof. The following is an analysis of the claims now pending in logical order:
  5. Rewritten version of cancelled claim 1. This claim states the devices in more detail.
  6. Rewritten version of cancelled claim 2. This claim states the communications used between the devices in more detail.
  7. Rewritten version of cancelled claim 3. This claim states the methods used to secure communications used between the devices in more detail.
  8. Rewritten version of cancelled claim 4. This claim states the security methods detail used to secure communications between devices in more detail.
3. Claims 1, 2, 3, and 4 were rejected under 35 U.S.C.102(e) as being anticipated by Ereksen, US 6,622,018. Reconsideration of this rejection is respectfully requested because Ereksen is a palm pilot utilizing Bluetooth technology to control devices such as room lights, lamps, television, stereos turning these devices on and off. Whereas LAPDESK1400 uses a laptop-like device to wirelessly remote control a desktop computer as though the user were typing on directly on the desktop. To my knowledge LAPDESK1400 is clear of any similarities of claims Ereksen patent 6,622,018.

#### Conclusion

4. For all reasons given above, this application is now submitted to contain claims which define a novel, patentable and truly valuable invention. Hence allowance of this application is respectfully submitted to be proper and is respectfully solicited.

Very respectfully,

  
Harold J. Keith
